

Oded Barak Wechsler

QA ENGINEER WITH IT & NETWORKING BACKGROUND

Professional summary

Experienced QA Engineer and Network Administrator with a broad background in IT infrastructure, manual software testing, system analysis, and client-facing roles. I am skilled in test planning, bug tracking, SQL, Agile methodologies, and cross-functional team collaboration.

Seeking a QA position (manual or combined with automation) involving end-to-end testing, system analysis, and ownership of testing processes in a dynamic and professional environment.

Professional Experience

2024-Present

QA Engineer, Grasshoppers

- Performed manual testing for Web and mobile applications
- Managed bug tracking using **XRAY**
